

Course Map and Course Banner

By default the Course Guide and the Course Banner are viewable. However, both of these can be closed to allow more room on the screen. Please note that this is an individual user preference. This means that if you, as the editor of the course, hide the banner or close the course map, your students will still see them unless they hide them as well.

To Close the Guide or the Banner

- To close the Course Guide, click on the small stack of triangles located in the upper right corner of the guide.
- To close the banner, click on the small arrow located in the upper right corner of the banner.

To Open the Guide or the Banner

- To open the Course Guide, click on the small stack of triangles located next to the Home icon.
- To open the banner, click on the small arrow located in the upper right above your name.
