

# Using MyMathLab to Improve a Test Score

## MAC1105 College Algebra

### **Overview**

You may replace any one (1) in-class Test score (except Test 5) with your score on the *corresponding* MyMathLab Chapter Test. In order to take a MyMathLab Chapter Test, you must first successfully complete a MyMathLab Quiz on each section in the Chapter.

### **Section Quizzes**

Each Quiz is composed of 5 questions from a section in the Chapter. You must score at least 70% on each Quiz in order to advance to the next section in the Chapter. Once you complete all of the Quizzes in the Chapter, you may then take the Chapter Test.

You have an unlimited amount of time on each Quiz.  
You may take each Quiz an unlimited number of times.

### **Chapter Test**

The MyMathLab Chapter Test covers all of the sections in the Chapter. Most of the questions on the Chapter Test come from the Quiz questions. Once you complete the MyMathLab Chapter Test, print out a SUMMARY of your Chapter Test score and turn it in so I can REPLACE your in-class Test score with your corresponding MyMathLab Chapter Test score.

You have a maximum of two (2) hours to complete each Chapter Test.  
You may take the Chapter Test a maximum of two (2) times; I will use the higher Chapter Test score to replace your corresponding in-class Test score.

### **MyMathLab Chapter Test Deadlines**

The deadline for completing any MyMathLab Chapter Test is the night BEFORE the next in-class Test (similar to my Late Homework Policy).

You are allowed to complete as many MyMathLab Chapter Tests as you like, however, I will only replace ONE (1) in-class Test score with your corresponding MyMathLab Chapter Test score.
